REVOLUTIONARY NEW  
STAINLESS STEEL  
**HAMMERTEX**

THE FINISH THAT'S DESIGNED FOR OUR DEMANDING INDUSTRY

# ACE

## MANUFACTURING FINALLY, A STAINLESS STEEL FINISH THAT'S DESIGNED FOR OUR INDUSTRY.

Introducing a new Stainless Steel Finish that will revolutionize how you view Stainless Steel. The new HAMMERTEX finish improves the look you were unable to obtain with the conventional #4 finish. Stainless Steel is designed to withstand harsh and corrosive environments and the new HAMMERTEX finish will enhance the versatility of the product.

Some of the many advantages of HAMMERTEX finish include:

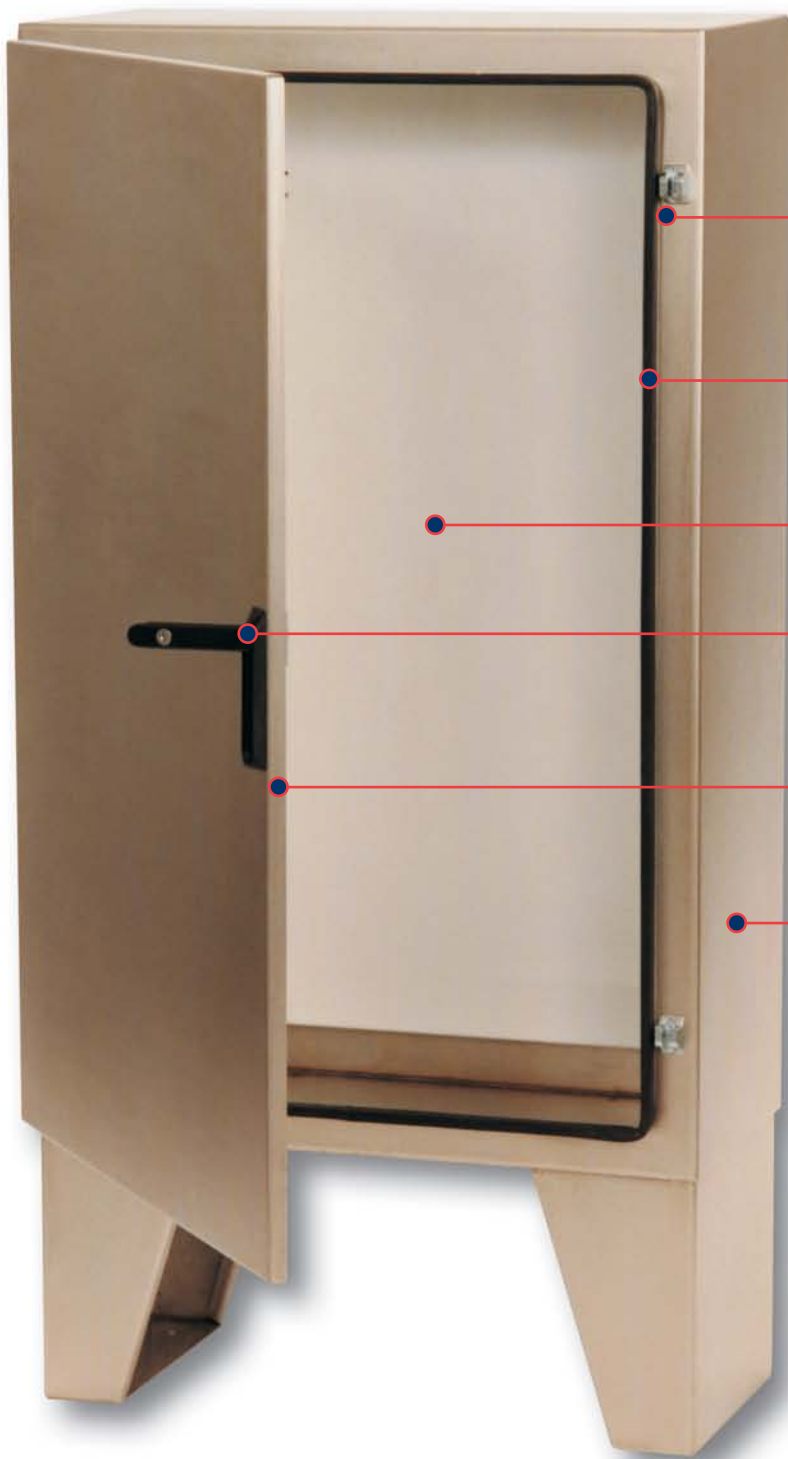

- Does not alter material characteristics of stainless steel
- Elimination of grains to be matched
- Robust non-directional pewter type finish
- Low maintenance
- Does not require continuous cleaning
- Marking and scuffing are virtually eliminated
- Reflection and refraction of light will be diffused eliminating glare

The polished #4 finish on mill grade stainless steel was originally designed primarily for the food and beverage industry. We have used this finish for years, as there was no alternative.

HAMMERTEX Stainless Steel is the answer for the rugged environments imposed in our industry. Wherever you use Stainless Steel be sure to specify Ace HAMMERTEX.

**STAINLESS STEEL HAMMERTEX  
FREEDOM SERIES ENCLOSURE**

## FREEDOM SERIES NEMA 4/12 ENCLOSURE

### BENEFITS:

**Dedicated Hinge and Locking Assembly** - designed exclusively for electrical enclosures

**Extruded EDPM Rubber Composite Gasketing** - completely memory free, gasketing mounted on cabinet not door

**Dual Rated Certification** - manufactured to both Canadian and U.S. electrical standards

**Modern Design** - elimination of cumbersome clamps or clips

**Manufactured to Exceed Standards** - freedom series not only meets but exceeds minimum NEMA Standards

**Unlimited Width Range** - can be built to your specific width requirements

**Environmentally Friendly** - all components can be recycled upon completion of product life cycle

**BUILT WITH YOU IN MIND**

## WHO ARE WE?

Ace has been manufacturing quality electrical, electronic and data enclosures since 1977. Our philosophy has always been to design and build product for you, our customer. Therefore, custom manufacturing is our specialty. Whether you are looking for a few or plenty

**ISO 9002** we have the capabilities to provide you with the quality product you deserve. We are able to assist you from inception in the prototype stage with qualified designers and drafters through production to the completed product.

You can rely on us to provide you with the full turn-key solution for all your metal needs including manufacturing and fabrication of precision metal enclosures, consoles, power pedestals, chassis, modular cabinets, data racks and customer specified products. We work with various substrates including mild, galvanized and stainless steel, and aluminums. Finishes include powder coating, zinc plating, cadmium plating, hot dipped galvanizing, anodizing, and industrial silk-screening.
